Case Narrative

Terpenes - Phytol result was above normally accepted recovery criteria in the Method Blank. Beta Ocimene result was below normally accepted recovery criteria in the Blank Spike.

Pesticides - Multiple analytes recovered above the upper acceptance limit in the Blank Spike. Analytes were below the reporting limit in all client samples. See QC Report for details.

Mycotoxins - Aflatoxin B2 recovered below the lower acceptance limit in the Blank Spike. The Matrix Spike and Matrix Spike Duplicate recovered within or above acceptance limits for this analyte. Additionally, no peaks were identified in the retention time window of these analytes in client samples.

The Laboratory Control Sample (LCS) contained analytes that exceed state-established control limits, but meet the definition of Allowable Marginal Exceedances (AME), and do not invalidate the results.
